PROJECTS

ShowTracker &

Chrome Extension to track series, anime, and movie progress across streaming platforms.

- Automatically detects current video title, episode, and timestamp.
- Saves progress locally or syncs via a .NET Core Web API.
- Allows manual episode tracking and history browsing.
- Built using JavaScript, Chrome Extension APIs, and ASP.NET Core Web API with SQL Server.

StudyHub @

A full-stack web application to organize and track tech learning resources.

- Built with ASP.NET Core and Entity Framework Core, featuring full CRUD functionality.
- Allows users to save, tag, rate, and track progress on tutorials, articles, and courses.
- Implemented custom filtering and search logic for efficient resource management.
- Deployed to Azure App Service with integrated database using Azure SQL.

WORK EXPERIENCE

Internship, Pentalog - a Globant division

Project: ReFreshAI - AI-powered Eco Marketplace for Recyclable Materials @

Sept 2024 – Oct 2024 Chişinău, Moldova

- Built a full-stack web app using Java Spring Boot and MySQL.
- Integrated Ollama AI for smart chat, auto-descriptions, and price suggestions.
- Developed features: auth, product CRUD, filters, cart, reviews, profile.
- Collaborated in a team of 5 using Agile, Git, Jira, and Postman.
- Simulated real-world process with guidance from a Product Owner and Scrum Master.
